LAB EXERCISE 4

HOSPITAL MANAGEMENT REPORTS, DASHBOARDS AND CALENDAR VIEWS

Aim

To study the reporting features of Zoho Creator by viewing hospital dashboard metrics and analysing appointment information in tabular, status, transfer and calendar formats.

Procedure

Access the Hospital Management System application in Zoho Creator. Start with the dashboard to note the displayed metrics and charts. Open the appointment report and status view, inspect the detailed records, and examine the available data export and import options. Finally, switch to the weekly and monthly calendar views to review the appointment schedule.

Overview of Dashboard Metrics

The dashboard acts as a summary page for the hospital application. It displays cards for financial totals, prices, daily room charges and the number of appointments. Charts underneath summarise charges and room availability across floors.

ıe total number of appointments, while charts provide a quick view of activity.

Tabular Appointment Report

Appointment entries are arranged in a structured table. The displayed information includes an appointment ID, patient and doctor references, department, scheduled date, scheduled time and reason for the visit.

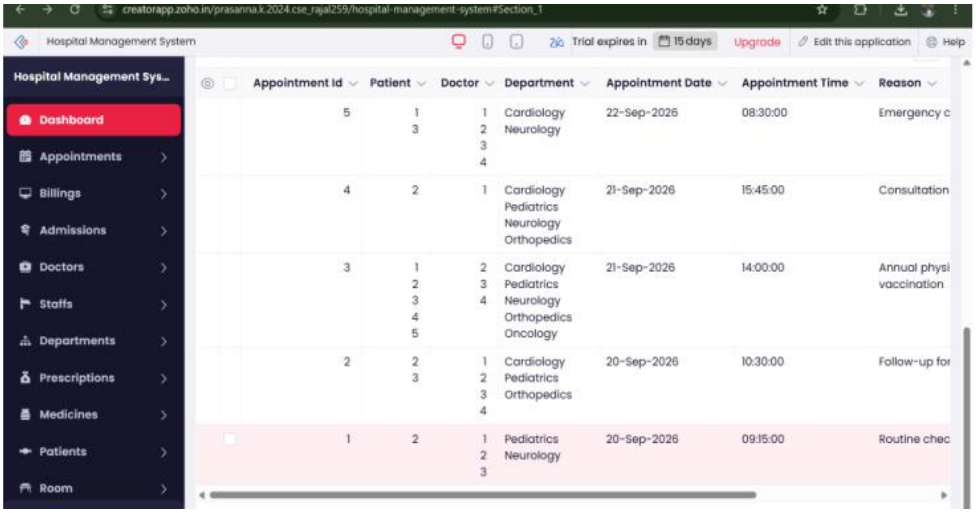

Figure 2: Appointment records in tabular report view.

Appointment Status Details

The appointment status report shows the progress or outcome of each booking. Completed and cancelled entries are visible with their associated department, appointment date, time and reason.

ɔointment view shows the status of each appointment, including completed and cancelled records, along with ıent, date, time and reason.

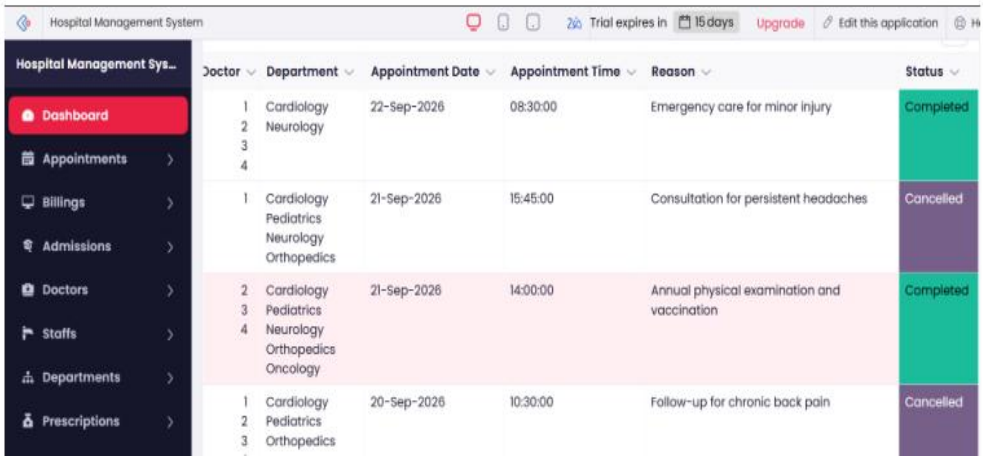

Figure 3: Appointment report showing status information.

Detailed Records on the Dashboard

The dashboard also includes an appointment-record section beneath its charts. This allows the user to move from an overall graphical summary to individual booking details, including patient and doctor information.

nation.

Appointment Report Export Option

Users can export the appointment status report from the status section. The export window provides settings for the file name, file type and the report fields to be saved.

Appointment Data Import Option

An Import Data control is available from the All Appointments area. It supports adding information from a computer, a web address, a cloud location or data pasted into the import interface.

Figure 6: Import data interface and available data sources.

Grouped Appointment Status

The All Appointments screen separates records into status groups such as Booked, Completed and

Confirmed. This arrangement gives a quick indication of how the bookings are distributed.

Figure 7: All Appointments grouped by status.

Weekly Schedule View

The weekly calendar shows appointments within the selected week and places them in the relevant day and time positions. It is useful for checking the short-term schedule.

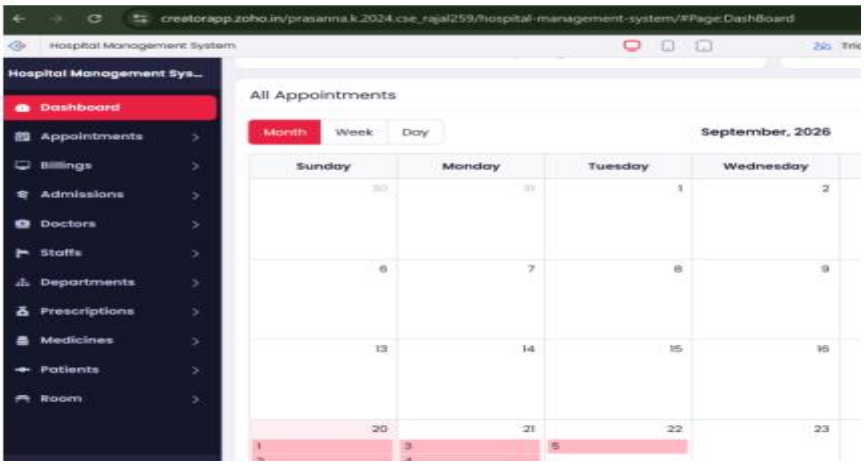

Figure 8: Weekly appointment calendar.

Monthly Schedule View

The month view displays appointment items on their calendar dates. It gives an at-a-glance picture of the bookings planned throughout the selected month.

Result

Zoho Creator's reporting tools were used to review the Hospital Management System. The dashboard, appointment tables, status grouping, data transfer controls and calendar displays offer complementary views for monitoring hospital appointments.
