ASSIGNMENT – 03

Vehicle Service Reports Suite Report Types Use Case

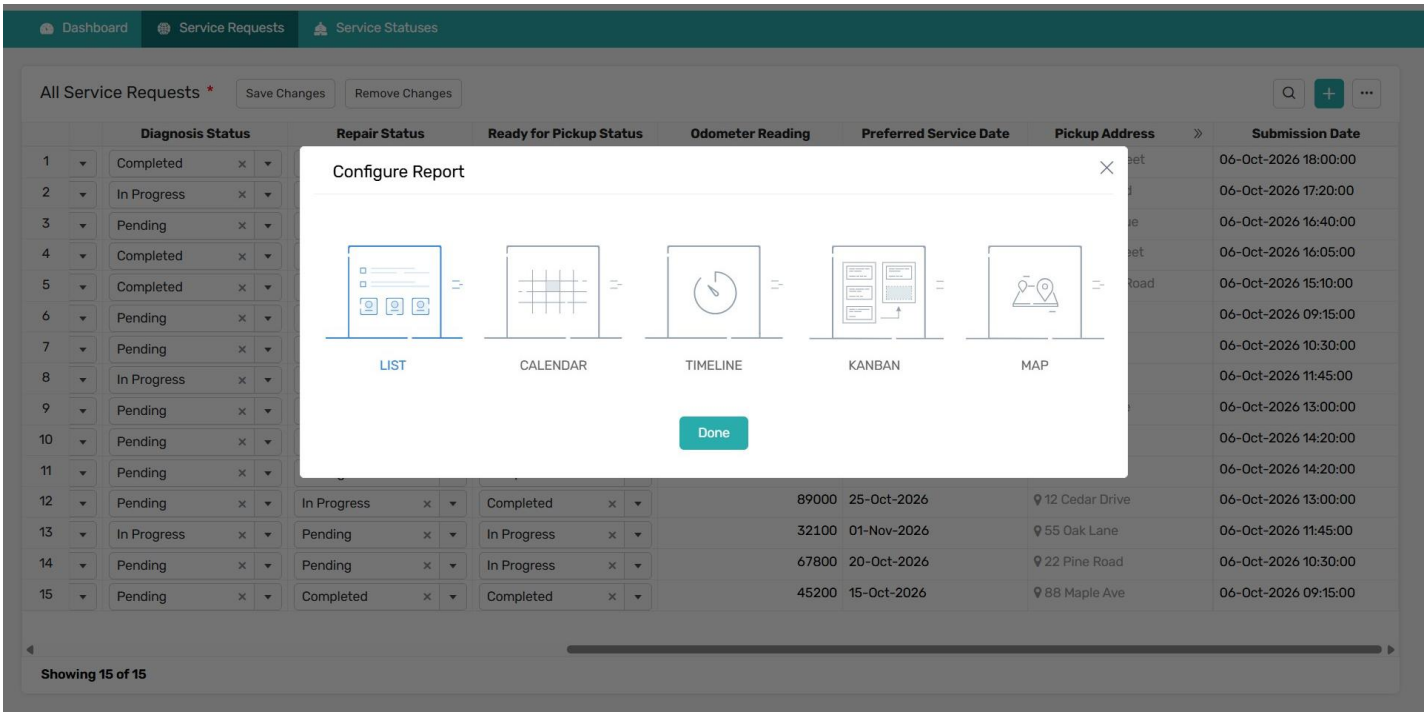

Objective:

To design and build a complete suite of Reports in Zoho Creator for the existing "Vehicle Service Request Form" application, demonstrating the correct usage of various Report Types (List View, Spreadsheet View, Kanban View, Calendar View, Map View, Timeline View, etc.) so that the service center staff can view, analyze, and act on service request data from multiple perspectives.

Procedure:

1. List View Configuration:

Create an "All_Service_Requests_List" to serve as the default landing report. Configure columns for Owner Name, Vehicle Registration Number, Vehicle Type, and Service Status. Ensure it provides a simple, scrollable list for quick browsing.

2. Spreadsheet View Setup:

Configure a "Service_Requests_Spreadsheet" to allow inline bulk edits. Group the records by Vehicle Type and allow the front office staff to easily update Diagnosis Status, Repair Status, and Ready for Pickup Status.

3. Kanban View Configuration:

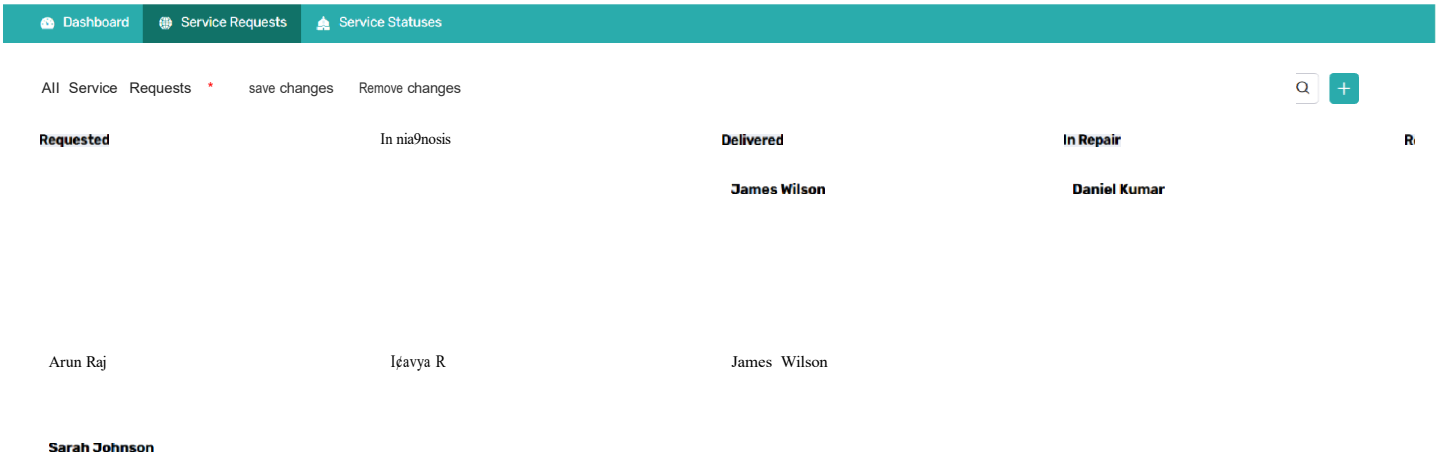

Build a "Service_Status_Kanban" grouped by the Service Status field. This visual layout allows technicians to drag and drop service request cards between columns (e.g., Requested, In Diagnosis, In Repair, Delivered) to instantly update their status.

4. Calendar View Setup:

Design a "Service_Schedule_Calendar" based on the Preferred_Service_Date field. This allows technicians to see how many vehicles are scheduled on specific dates to plan their daily workload.
