EXPERIMENT – 01

Forms for Campus Event & Participation Management System

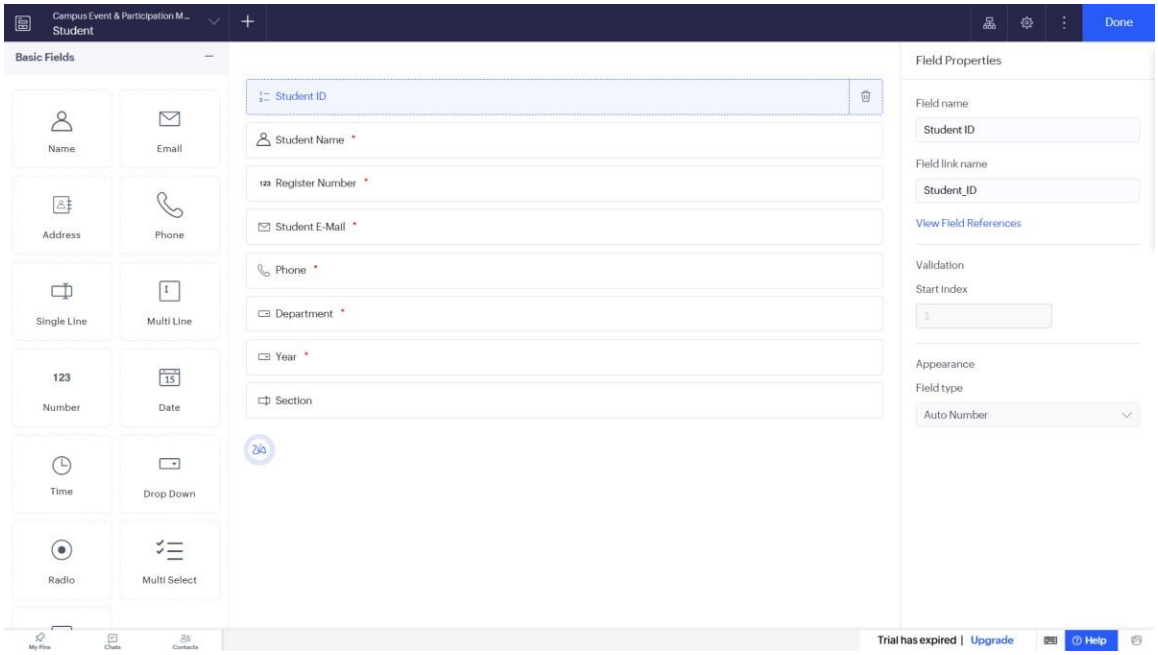

Aim:

To design and develop a set of interrelated data collection forms for a Campus Event & Participation Management System using a low-code application development platform.

Procedure:

1. 1. Student Form Creation:

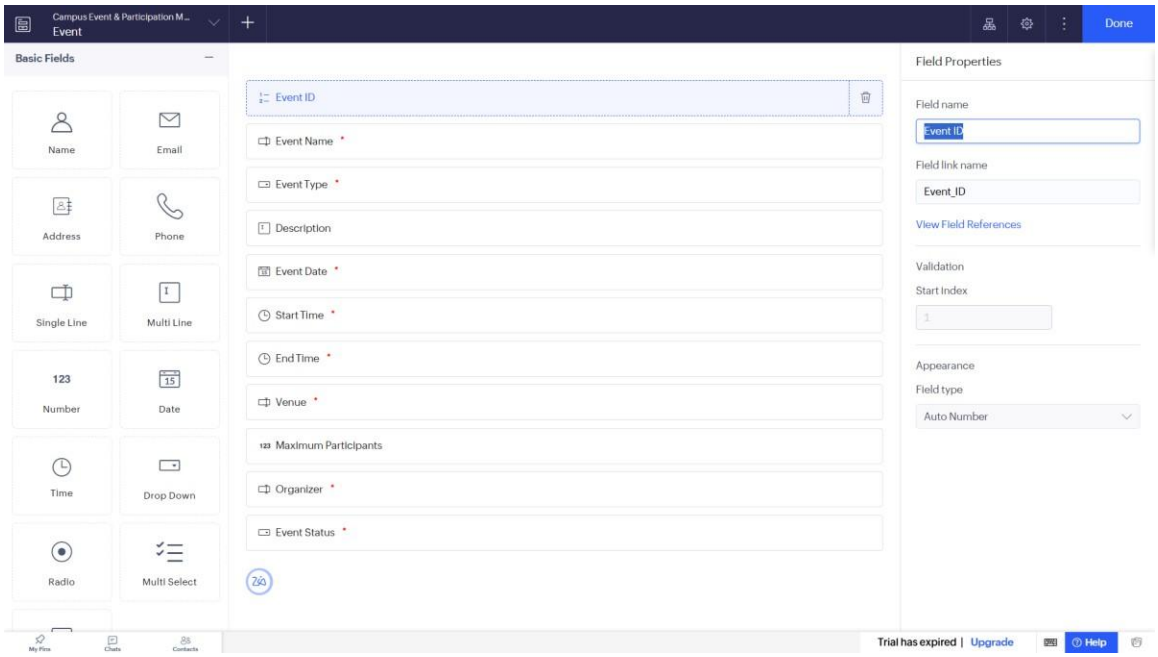

Create a form named "Student" to capture participant details. Add fields such as Student ID (Auto Number), Student Name, Register Number, Student E-Mail, Phone, Department, Year, and Section.

2. 2. Event Form Creation:

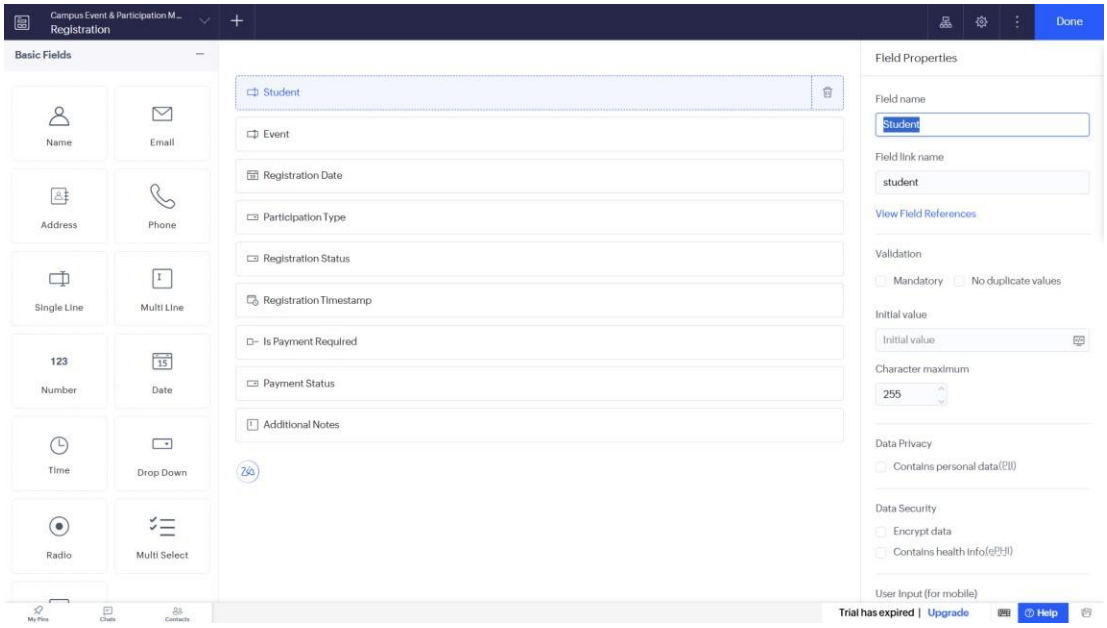

Create an "Event" form to define the campus events. Include fields for Event ID (Auto Number), Event Name, Event Type, Description, Event Date, Start

Time, End Time, Venue, Maximum Participants, Organizer, and Event Status.

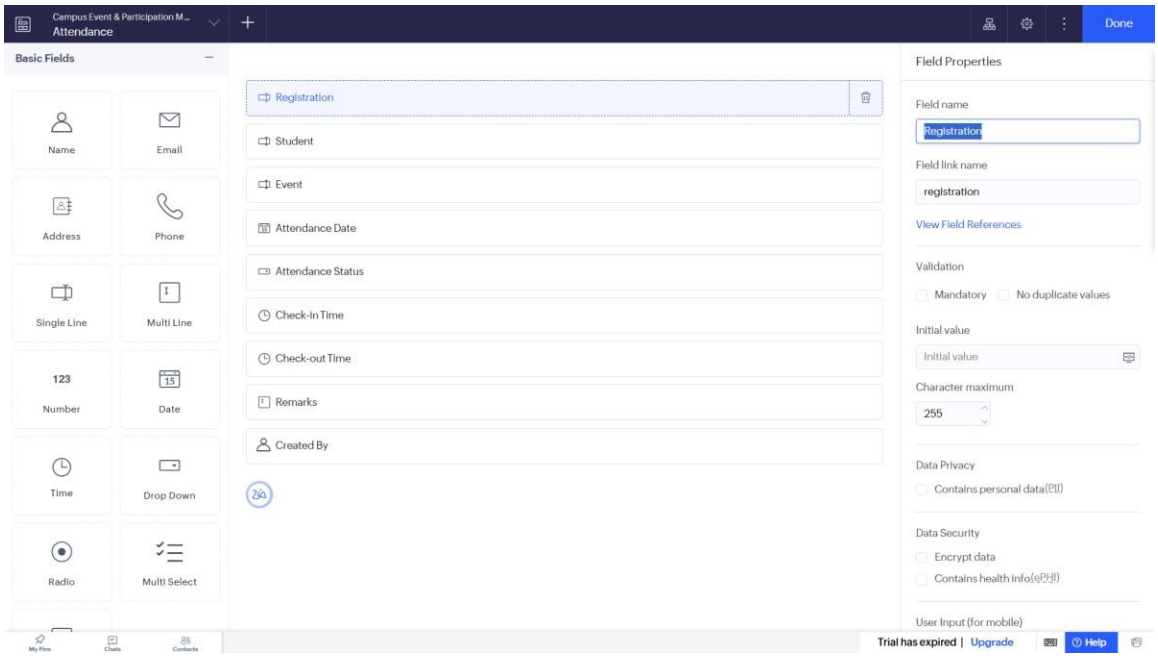

3. 3. Registration Form Creation:

Develop a "Registration" form to link students to events. Include lookup fields for Student and Event. Add fields for Registration Date, Participation Type, Registration Status, Registration Timestamp, Is Payment Required, Payment Status, and Additional Notes.

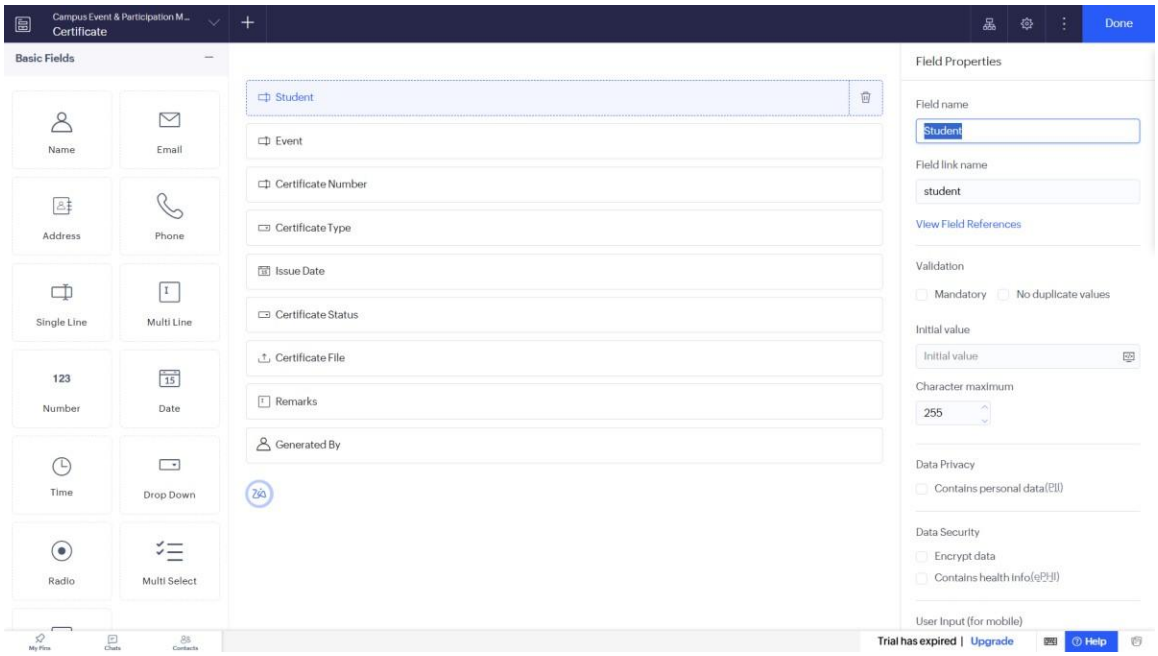

4. 4. Attendance Form Creation:

Build an "Attendance" form to track check-ins. Incorporate lookup fields for Registration, Student, and Event. Add fields for Attendance Date, Attendance Status, Check-in Time, Check-out Time, Remarks, and Created By.

5. 5. Certificate Form Creation:

Design a "Certificate" form for issuing credentials. Use lookup fields for Student and Event. Include fields for Certificate Number, Certificate Type, Issue Date, Certificate Status, Certificate File (File Upload), Remarks, and Generated By.

Conclusion:

The structural forms for the Campus Event & Participation Management System were successfully designed and implemented. By utilizing a low-code platform, distinct modules for managing students, events, registrations, attendance, and certificates were successfully created and interlinked to streamline campus event operations.
